

KCHITIZ SHUKLA

Software Engineer | Full-Stack Developer

New Delhi, India | +91 63892 27183 | kchitizshukla@gmail.com | linkedin.com/in/kchitiz-shukla | github.com/kchitizshukla

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 1+ years of hands-on experience delivering scalable web and mobile applications using React.js, React Native, and .NET (ASP.NET Core), backed by SQL Server, PostgreSQL, and MongoDB. Shipped 10+ production screens and 2 enterprise applications within one year, including an in-house platform that cut software licensing costs by INR 85,000/month. Proficient in RESTful API design, microservices architecture, CI/CD pipelines on GCP, and Agile/Scrum methodologies, with demonstrated ability to collaborate across cross-functional teams and drive end-to-end SDLC delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C#, Java, SQL

Frontend: React.js, Next.js, React Native, Angular, Redux, HTML5, CSS3, Responsive & Cross-Platform UI

Backend: .NET / ASP.NET Core, Node.js, FastAPI, RESTful APIs, Microservices, Distributed Systems

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Database Design, Query Optimization, Stored Procedures

Cloud & DevOps: Google Cloud Platform (GCP), AWS, Docker, CI/CD Pipelines, Git, GitHub, Postman

AI / ML & Data: Machine Learning, LLM Integration, AI Agents, ETL Pipelines, Automation Workflows

Methodologies: Agile, Scrum, SDLC, Code Reviews, Unit Testing, Technical Documentation, System Design

PROFESSIONAL EXPERIENCE

Software Engineer – Vensysco Technologies

Jul 2026 – Present

Noida, Uttar Pradesh

- Building a comprehensive Observer Management System (OMS) to streamline onboarding, registration, duty allocation, and real-time tracking of observers for government examinations.

Software Engineer – BlueKaktus

Sep 2024 – Jun 2026

New Delhi, India (On-Site)

- Designed and deployed 10+ end-to-end web and mobile screens for order tracking and production management (React Native, React.js, .NET, SQL Server), reducing order-status lookup time by ~40%.
 - Architected a real-time ledger management system (React.js, .NET RESTful APIs, SQL Server) processing 1,000+ daily transactions and cutting manual reconciliation effort by ~30%.
 - Automated an ML-driven ETL workflow (Python, MongoDB) that standardized 500+ unstructured Excel files, slashing manual processing time by ~90%.
 - Delivered a full-stack machine-maintenance application (React Native, .NET, SQL Server) adopted by 20+ technicians, incorporating unit testing and debugging to maintain low defect rates.
 - Spearheaded the launch of an in-house ticketing and service-management platform (React Native, .NET, PostgreSQL) for 50+ users, replacing JIRA and saving INR 85,000/month in licensing costs.
-

PROJECTS

FixMyRide – Cross-Platform Automotive Service Management System

React Native, Next.js

- Created a cross-platform application with 2 role-based modules (customer and mechanic) featuring real-time tracking, service booking, and analytics dashboards across 15+ screens.
- Implemented end-to-end workflows for vehicle management, job assignments, inspections, payments, and invoicing, applying performance optimization and responsive-design best practices.

Facial Recognition Security Application

Python, OpenCV

- Constructed a real-time facial recognition system (OpenCV, face_recognition) achieving ~95% identification accuracy on live camera feeds, with automated alerting and third-party camera integration.
-

EDUCATION

B.Tech, Artificial Intelligence and Data Science – VIPS-TC (GGSIPU), New Delhi

Aug 2021 – Jun 2025

CGPA: 8.3 / 10.0

Class XII (ICSE) – Boys' High School and College, Prayagraj

2019 – 2020

Score: 91%

KEY ACHIEVEMENTS

- Saved INR 85,000/month (~INR 10.2 lakh/year) in licensing by replacing JIRA with a custom in-house service-management platform, demonstrating strong problem-solving and stakeholder collaboration.
- Reduced manual Excel processing time by ~90% across multiple client pipelines through an AI/ML-driven ETL automation workflow deployed in production.
- Shipped 10+ production screens and 2 full-stack enterprise applications within the first year, consistently meeting sprint deadlines in an Agile environment.
- Optimized 20+ RESTful APIs and SQL Server stored procedures, improving application response times by up to 40% and enabling seamless web-to-mobile integration.
- Delivered cross-platform React Native and React.js features for enterprise applications used by 500+ users, implementing secure authentication, offline support, and real-time data synchronization.
